

I sincerely hope that you do not do anything to compromise the broadcast of XM Radio Instant Traffic and weather. If they cannot broadcast this vital information, I will not receive critical updates as needed. I refuse to listen to FM or AM radio - the commercial interruptions and stupid DJ bantering and "joking" is maddening and frustrating. My alternative is CD. XM radio is here to stay - growing in subscribers everyday - people like me who are intelligent, busy and discriminating consumers - oh, did I say voters? Don't mess with my XM radio! (try it - you'll LOVE it) Thank you - Paula
